

# ST-2555 Pistol Grip Needle Scaler

The ST-2555 pistol grip features a thermally insulated handle and a lever-style throttle for easy operation, providing an ergonomic and comfortable feel. Made from high-strength alloys, these tools are vital in the corrosion control industry as they help minimise downtime.

The needle's ability to adjust to the contours of the workpiece allows for efficient cleaning of irregular surfaces, corners, and hard-to-reach areas, effectively removing rust, paint, weld slag, and other materials from various surfaces.

Applications include maintenance, construction, shipbuilding, automotive, and most marine industries for surface preparation and cleaning. Air needle scalers effectively remove rust, paint, weld slag and spatter, and other coatings, as well as cleaning steel, alloy, concrete, brick, and stone surfaces to prepare them for further work or painting.

<b>Manufacturer</b>	Sumake
<b>Model Number</b>	ST-2555
<b>Part number</b>	22-ST-2555-T
<b>Blows per minute</b>	3700
<b>Needles</b>	19 x 3mm Diameter x 180mm long
<b>Bore mm</b>	23.5 mm
<b>Air Consumption @ 6.2bar/90psi</b>	285 l/min (10cfm)
<b>Net weight kg</b>	2.7 kg
<b>Overall Length mm</b>	330mm
<b>Air Inlet</b>	¼" BSPF
